# Information for Contributors

PUBLIC HEALTH REPORTS welcomes from any source all contributions of value to public health.

Most of the readers of *Public Health Reports* are practicing public health officials. About 10 percent of the monthly circulation of *Public Health Reports* goes overseas. About half of the domestic circulation goes to Federal, State, and local government agencies concerned with health and related interests. A quarter goes to institutions accredited for teaching in health and related fields, to teachers, and to libraries. The journal also reaches research institutions, hospitals, and professional and voluntary public health organizations.

*Tearsheets.* In lieu of reprints, senior authors are provided with 50 to 100 sets of tearsheets after publication. Associate authors receive a smaller number.

*Manuscript review.* Manuscripts submitted for publication are reviewed by technical experts, and authors are given the benefit of their comments before type is set. Authors also receive edited typescripts for approval and are given the opportunity to correct galley proofs. Authors are responsible for the accuracy and validity of all material, including tables, charts, and references. Special editorial assistance in preparing or revising manuscripts is available on request, to the limit of staff resources.

Manuscripts are reviewed with the understanding that they have not been committed for publication elsewhere. Appropriate information should be provided if a paper has been given or is prepared for presentation at a meeting.

*Manuscript form.* Authors will facilitate review and publication if they submit an original and three carbon copies of their manuscripts. All copy should be typed double spaced, and each page should end with a completed paragraph. Of course, several paragraphs may appear on a typed page.

References should be given in the style used by *Public Health Reports*.

Footnotes should be worked into the text or offered as supplemental items.

Authors are expected to recognize scientific contributions by those who have assisted in their papers only if such contributions warrant mention in the text or in the paragraph identifying the authors. It is not the policy of *Public Health Reports* to publish "acknowledgments."

*Synopses.* To facilitate secondary publication, *Public Health Reports* publishes synopses of selected papers, principally research studies. Authors are requested to submit with appropriate papers a synopsis of not more than 200 words. The staff will supply on request information on preparation of synopses.

*Secondary publication.* Secondary publication of articles in *Public Health Reports* is provided in various abstracting journals. Articles are also indexed in the annual Cumulated Index Medicus (American Medical Association), the monthly Index Medicus (National Library of Medicine), the Engineering Index, the Hospital Literature Index, and the biannual supplements to the Cumulative Index to Nursing Literature.

*Bound copies.* Librarians and others should preserve their copies for binding, as the Public Health Service does not supply bound copies. Indexes are published each year in the December issue.

PUBLIC HEALTH MONOGRAPHS, edited and issued by *Public Health Reports*, must be submitted through constituent agencies of the Department of Health, Education, and Welfare.

Most Public Health Monographs are placed on sale by the Superintendent of Documents; series subscriptions are not available. Monographs are not included in subscriptions to *Public Health Reports*.

*Address correspondence on editorial matters to: Editor, Public Health Reports, Public Health Service, U.S. Department of Health, Education, and Welfare, Washington, D.C., 20201.*

# 1964 INDEX

## Public Health Reports

Volume 79, January–December

*and*

## Public Health Monograph

Number 72

THIS INDEX to *Public Health Reports* and Public Health Monographs is divided into a subject index and an author index.

The subject index carries one or more entries for each item published. In addition to the subject headings, categorical headings include ANNOUNCEMENTS (ORGANIZATIONS AND PERSONNEL), CONFERENCE REPORTS, EPIDEMIOLOGIC NOTES, EXHIBITS, INVENTION REPORTS, LEGAL NOTES, and TRAINING COURSES.

The Public Health Monograph published concurrently with *Public Health Reports* in 1964 appears under the category heading MONOGRAPHS. The monograph summary appearing in the journal is indexed under the appropriate subject heading.
